SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Trade name: VITROBRAZE® 2106

1.2 Relevant identified uses of the substance or mixture and uses advised against

Application of the article: Brazing foil

1.3 Details of the supplier of the information sheet

Manufacturer/Supplier:
VACUUMSCHMELZE GmbH & Co.KG
Grüner Weg 37
D-63450 Hanau
datasheet@vacuumschmelze.com

Further information obtainable from: Environmental Protection Department

1.4 Emergency telephone number:

Tel. no.: (**49) 6181/38-0
Emergency tel. no.: via (**49) 6181/38-0

SECTION 2: Hazards identification

2.2 Classification (substance or mixture)

Classification according to Regulation (EC) No 1272/2008 (CLP-Regulation):
Not applicable
For articles there is no obligation to classify acc. to CLP -Regulation.

2.2 Labelling according to Regulation (EC) No 1272/2008

Labelling according to Regulation (EC) No 1272/2008 (CLP-Regulation):
Not applicable

Additional VAC information:
In the case of dust-producing processing, we recommend observance of the following warnings :

Hazard statements
May cause allergy or asthma symptoms or breathing difficulties if inhaled.
May cause an allergic skin reaction.
May cause cancer by inhalation. Route of exposure: Inhalation.
May damage fertility.
Causes damage to organs through prolonged or repeated exposure.

Precautionary statements
Do not breathe dust/fume/gas/mist/vapours/spray.
Do not eat, drink or smoke when using this product.
Avoid release to the environment.
Use personal protective equipment as required.
In case of inadequate ventilation wear respiratory protection.

(Contd. on page 2)
**SECTION 3: Composition/information on ingredients**

- **Components (composition):**
- **Description:** Brazing foil

The classifications given below reflect the classification of each **pure substance** respectively and are intended for information only. The legal classifications of the pure substances (harmonized classification according to substance list of the Annex VI of the CLP Regulation) got complemented, insofar as additional substance-specific information from accessible data sources (e.g. TRGS 905, toxicological studies) for health hazards and / or physical hazards are available.

**The concentration of cobalt might be ≥ 0,1% (impurities)**

**Additional information:** For the wording of the listed hazard phrases refer to section 16.
SECTION 4: First aid measures

4.1 Description of first aid measures

After inhalation:
If metal vapours or dusts have been inhaled:
Get the affected person out in the fresh air and call a doctor.

After skin contact:
Foreign bodies which have penetrated the skin must be removed and the wound cleaned thoroughly.

After eye contact:
Foreign bodies must be removed, consult a doctor if necessary.
Beware of metal splinters - Consult a doctor immediately.

After swallowing:
Consult a doctor if the symptoms persist.

4.2 Most important symptoms and effects, both acute and delayed
No further relevant information available.

4.3 Indication of any immediate medical attention and special treatment needed
No further relevant information available.

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing agents:
Non-combustible.
Extinguishing agents must be adapted to the environment.

5.2 Special hazards arising from the substance or mixture
Formation of toxic smoke / fumes (metal / metal oxides) is possible during heating or in case of fire. Do not inhale fumes.

5.3 Advice for firefighters

Protective equipment:
Wear self-contained respiratory protective device.

SECTION 6: Accidental release measures

Accidental release of dusts and vapours which are damaging to health can be ruled out.

6.1 Personal precautions, protective equipment and emergency procedures
No special measures required.

6.2 Environmental precautions:
No special measures required.

6.3 Methods and material for containment and cleaning up:
No special measures required.

6.4 Reference to other sections
See Section 7 for information on safe handling.
See Section 8 for information on personal protection equipment.
See Section 13 for disposal information.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Danger of accident!
Always wear protective clothing, protective glasses and safety gloves when handling the bands.
- The bands have sharp edges. There is a danger of (serious) injury from cuts.
- The bands can split and cause (serious) cuts when bent excessively.

No protective measures are required in the provided form.
The appropriate industrial and environmental safety measures must be taken for processing steps which cause dust or fumer (see also section 8):
Ensure good ventilation/exhaustion at the workplace. Take note of emission threshold.

- **Information about fire - and explosion protection**: No special measures required.
- **7.2 Conditions for safe storage, including any incompatibilities**
- **Storage**:
  - **Requirements to be met by storerooms and receptacles**: No special requirements.
  - **Information about storage in one common storage facility**: Not required.
  - **Further information about storage conditions**: Store in dry conditions and in the dark.
  - **Storage class**: Not applicable
- **7.3 Specific end use(s)**: No further relevant information available.

---

### SECTION 8: Exposure controls/personal protection

- **Additional information about design of technical facilities**:
  Provide a suitable suction with filter and good ventilation of the working area for all processing steps.

  Suitable breathing apparatus must be used (see personal safety equipment) for repair and maintenance work on suction systems, especially when changing the filters.

- **8.1 Control parameters**
- **Ingredients with limit values that require monitoring at the workplace**:
  For International Limit Values see Additional information below.

</tbody>
</table>

- **DNELs**
  DNELs for OSH purposes
  In Germany, occupational exposure limits (AGW) of the Technical Rules on Hazardous Substances (TRGS) 900 continue to constitute workplace atmospheric limit values that are binding upon employers. Should no AGW and for example no maximum workplace concentration (MAK value) of the German Research Foundation (DFG) be available, the employer must also consider the DNEL during risk assessment.

  (Source: Institut für Arbeitsschutz der Deutschen Gesetzlichen Unfallversicherung (IFA))

  current values are available: http://www.dguv.de/ifa/gestis/gestis-dnel-liste/index.jsp.

- Additional Occupational Exposure Limit Values for possible hazards during processing:
  Compliance with the general dust limit value(s) (lung penetrating and/or inhalable fraction) must be ensured.
  If the occurrence of chrome (VI) compounds cannot be ruled out, the TRGS 910 (acceptance and tolerance concentrations) must be considered!
  If the occurrence of Boric acid/ Boron oxide cannot be ruled out, the appropriate workplace-related limit values must also be monitored!
  The AGW for nickel is to be used only for nickel metal.
  For thermal processes in the presence of atmospheric oxygen, oxidic nickel compounds must always be assumed and the ERB (TRGS 910) must be applied.

- Additional information:
  - The lists valid during the making were used as basis.
  - GESTIS International Limit Values:

- 8.2 Exposure controls
- Personal protective equipment:
  - General protective and hygienic measures:
    Keep away from foodstuffs, beverages and feed.
    Wash hands before breaks and at the end of work.
    Store protective clothing separately.
    Do not eat, drink, smoke or sniff while working.

  - Respiratory protection:
    In the case of exceeding the limit values, breathing apparatus must be worn.
    Time limits for wearing must be observed.
    Breathing mask, apparatus with particle filter P2 or P3, for example:
    - Full face mask (EN 136)
    - Breathing mask (EN 149) FFP2 or FFP3
    - 10 times the limit value (FFP2)
    - 30 times the limit value (FFP3)
    - Recommendation: P3

  - Protection of hands:
    Avoid repeated and prolonged contact with the skin, use protective gloves.
    Preventive skin protection by use of skin-protecting agents is recommended.

- Material of gloves
  Experience has shown glove materials polychloroprene, nitrile caoutchouc, butyl caoutchouc, fluoride caoutchouc and polyvinylchloride to offer sufficient protection.

- Penetration time of glove material

- Eye protection:
  Tightly sealed goggles (EN 166)
SECTION 9: Physical and chemical properties

- 9.1 Information on basic physical and chemical properties
  - General Information
    - Appearance:
      - Form: Strip
      - Colour: Metallic
      - Odour: Odourless
    - pH-value: Not applicable.
  - Change in condition
    - Melting point/Melting range (approx.): 1,040 °C
    - Auto-ignition temperature: Not applicable
    - Explosive properties: Not applicable
    - Vapour pressure: Not determined.
    - Density (approx.) at 20 °C: 7.5 g/cm³
    - Relative density: Not determined.
    - Solubility in / Miscibility with water: Insoluble.
- 9.2 Other information
  - No further relevant information available.

SECTION 10: Stability and reactivity

- 10.1 Reactivity
  - No further relevant information available.
- 10.2 Chemical stability
  - Thermal decomposition / conditions to be avoided: No decomposition if used according to specifications.
- 10.3 Possibility of hazardous reactions
  - Hydrogen is released in contact with acid which can cause explosive gas mixtures.
- 10.4 Conditions to avoid
  - No further relevant information available.
- 10.5 Incompatible materials: No further relevant information available.
- 10.6 Hazardous decomposition products:
  - No dangerous decomposition products known.

SECTION 11: Toxicological information

- 11.1 Information on toxicological effects
  - Acute toxicity
    - Based on available data, the classification criteria are not met.
- LD/LC50 values:
  - 7440-02-0 nickel
    - Oral LD50: >9,000 mg/kg (rat)
  - 7440-42-8 boron
    - Oral LD50: 650 mg/kg (rat)
  - 7440-48-4 cobalt
    - Oral LD50: 550 mg/kg (rat)
**SECTION 12: Ecological information**

- **12.1 Toxicity**
  - **Aquatic toxicity**: No further relevant information available.
- **12.2 Persistence and degradability** No further relevant information available.
- **12.3 Bioaccumulative potential** No further relevant information available.
- **12.4 Mobility in soil** No further relevant information available.
- **Additional ecological information**:
  - **General notes**: Alloys in solid form do not pose an ecological threat.
- **12.5 Results of PBT and vPvB assessment**
  - **PBT**: Not applicable.
  - **vPvB**: Not applicable.
- **12.6 Other adverse effects** No further relevant information available.

**SECTION 13: Disposal considerations**

- **13.1 Waste treatment methods**
  - **Recommendation** Observe official regulations.
- **Uncleaned packaging**: Not applicable

**SECTION 14: Transport information**

- **Transport/Additional information**:
  - **Land transport ADR/RID (cross-border)**:
    - **Remarks**: Non-hazardous goods from the standpoint of the specified regulations
  - **Maritime transport IMDG**:
    - **Remarks**: Non-hazardous goods from the standpoint of the specified regulations

(Contd. on page 8)
SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

- Directive 2012/18/EU
- Named dangerous substances - ANNEX I
  None of the ingredients is listed.
- REGULATION (EC) No 1907/2006 ANNEX XVII
  Conditions of restriction: 27

15.2 Chemical safety assessment: Void (for articles)

SECTION 16: Other information

This information is based on our present knowledge. However, this shall not constitute a guarantee for any specific product features and shall not establish a legally valid contractual relationship.

Relevant phrases

Wording of the hazard warnings mentioned (Chapter 3) for pure substances:
- H302 Harmful if swallowed.
- H317 May cause an allergic skin reaction.
- H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled.
- H350i May cause cancer by inhalation. Route of exposure: Inhalation.
- H351 Suspected of causing cancer. Route of exposure: Inhalation.
- H360F May damage fertility.
- H372 Causes damage to organs through prolonged or repeated exposure.
- H413 May cause long lasting harmful effects to aquatic life.
