SECTION 1: Identification of the substance/mixture and of the company/undertaking

• 1.1 Product identifier
  • Trade name: Thermoelectric Material - VACOTHERM®

• Detailed descriptions:
  VACOTHERM® n
  © registered trademark of VACUUMSCHMELZE GmbH & Co. KG

• Information sheet - no.: IB136

• Remarks for information sheet
  Our semi-finished and finished products constitute manufactured articles under the terms of the REACH Regulation (EC) No. 1907/2006. Articles are not subject to any legal obligation concerning production and distribution of material safety data sheets. The detailed information usually shown in a safety data sheet will be provided in the form of an 'Information sheet for articles' for specific alloys. However, we expressly point out that these information sheets for articles are voluntarily produced data sheets which are not governed by the requirements of the REACH regulation.

• 1.2 Relevant identified uses of the substance or mixture and uses advised against
  Not applicable

• Application of the article: Active material (legs) in thermoelectric modules

• 1.3 Details of the supplier of the information sheet
  • Manufacturer/Supplier:
    VACUUMSCHMELZE GmbH & Co.KG
    Grüner Weg 37
    D-63450 Hanau
    datasheet@vacuumschmelze.com

• Further information obtainable from: Environmental Protection Department

• 1.4 Emergency telephone number:
  • Tel. no.: (**49) 6181/38-0
  • Emergency tel. no.: via (**49) 6181/38-0

SECTION 2: Hazards identification

• 2.2 Classification (substance or mixture)
  Classification according to Regulation (EC) No 1272/2008 (CLP-Regulation):
  Not applicable
  For articles there is no obligation to classify acc. to CLP-Regulation.

• 2.2 Labelling according to Regulation (EC) No 1272/2008
  Labelling according to Regulation (EC) No 1272/2008 (CLP-Regulation):
  Not applicable

• Additional VAC information:
  In the case of dust-producing processing, we recommend observance of the following warnings:
  The hazard statements result from the ingredients (composition) of the alloy and the applied nickel coating.
  • Hazard statements
    May cause an allergic skin reaction.
    Suspected of causing cancer.
    Causes damage to organs through prolonged or repeated exposure.
  • Precautionary statements
    Do not breathe dust/fume/gas/mist/vapours/spray.
    Wash thoroughly after handling.
    Wear protective gloves/protective clothing/eye protection/face protection/hearing protection.
    IF exposed or concerned: Get medical advice/attention.
    IF skin irritation or rash occurs: Get medical advice/attention.

(Contd. on page 2)
Dispose of contents/container in accordance with local/regional/national/international regulations.

- **2.3 Other hazards**
  - **Dry mechanical processing** is only permitted under special safety precautions because dusts which are capable of self-heating or pyrophorous dusts with a tendency to explode may be produced.
  - **In the case of wet mechanical processing:**
    The resulting processing sludges must be kept under a protective liquid because drying out sludges are capable of self-heating or may react pyrophorously.

- **Results of PBT and vPvB assessment**
  - **PBT:** Not applicable.
  - **vPvB:** Not applicable.

### SECTION 3: Composition/information on ingredients

- **3.2 Chemical characterization:**
  - **Description:** Metal in compact form

- **Components (composition):**
  - The classifications given below reflect the classification of each pure substance respectively and are intended for information only.
  - The legal classifications of the pure substances (harmonized classification according to substance list of the Annex VI of the CLP Regulation) got complemented, insofar as additional substance-specific information from accessible data sources (e.g. TRGS 905, toxicological studies) for health hazards and/or physical hazards are available.

  The following classification of the physical hazards refers to the substances in form of powders only.

- **NON-hazardous Ingredients**
  - tin

- **Remark to the composition:**
  - Nickel is still a component of the coating
  - (Nickel, Nickel/Gold or Nickel/Silver)

- **Additional information:** For the wording of the listed hazard phrases refer to section 16.

### SECTION 4: First aid measures

- **4.1 Description of first aid measures**

- **After inhalation:**
  - If metal vapours or dusts have been inhaled:
    - Get the affected person out in the fresh air and call a doctor.
5.1 Extinguishing media

Suitable extinguishing agents: Special powder for metal fires. Do not use water.

For safety reasons unsuitable extinguishing agents: Water

5.2 Special hazards arising from the substance or mixture

Formation of toxic smoke / fumes (metal / metal oxides) is possible during heating or in case of fire. Do not inhale fumes.

5.3 Advice for firefighters

Protective equipment: No special measures required.

SECTION 6: Accidental release measures

Accidental release of dusts and vapours which are damaging to health can be ruled out.

6.1 Personal precautions, protective equipment and emergency procedures

No special measures required.

6.2 Environmental precautions

No special measures required.

6.3 Methods and material for containment and cleaning up

No special measures required.

6.4 Reference to other sections

See Section 7 for information on safe handling.
See Section 8 for information on personal protection equipment.
See Section 13 for disposal information.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

No safety precautions are necessary in the delivered form.

The appropriate industrial and environmental safety measures must be taken for processing steps which cause dust (see also section 8):

Ensure good ventilation/exhaustion at the workplace.

Take note of emission threshold.

Dry mechanical processing is only permitted under special safety precautions because dusts which are capable of self-heating or pyrophorous dusts with a tendency to explode may be produced.

In the case of wet mechanical processing:

The resulting processing sludges must be kept under a protective liquid because drying out sludges are capable of self-heating or may react pyrophorously.

Information about fire - and explosion protection: No particular measures are required in the provided form.

7.2 Conditions for safe storage, including any incompatibilities

Storage:

Requirements to be met by storerooms and receptacles: No special requirements.

Information about storage in one common storage facility: Not required.
Further information about storage conditions: Not applicable

Storage class: Not applicable

7.3 Specific end use(s) No further relevant information available.

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Additional information about design of technical facilities:
Provide suction with filtering for good airing and ventilation of the work area during processing steps which cause dust. Air return is only permitted in exceptional cases.
If industrial vacuum cleaners are used, these must have dust class H (DIN EN 60335-2-69).
Suitable breathing apparatus must be used during repair and maintenance work to suction systems, especially when changing filters (see personal safety equipment).

Ingredients with limit values that require monitoring at the workplace:
For International Limit Values see Additional information below.

DNELs

DNELs for OSH purposes
In Germany, occupational exposure limits (AGW) of the Technical Rules on Hazardous Substances (TRGS) 900 continue to constitute workplace atmospheric limit values that are binding upon employers. Should no AGW and for example no maximum workplace concentration (MAK value) of the German Research Foundation (DFG) be available, the employer must also consider the DNEL during risk assessment.
(Source: Institut für Arbeitsschutz der Deutschen Gesetzlichen Unfallversicherung (IFA))
current values are available: http://www.dguv.de/ifa/gestis/gestis-dnel-liste/index.jsp.

<tr>
<td>7440-67-7 zirconium (powder)</td>
<td>5 mg/m³ (Ind)</td>
<td>5 mg/m³ (Ind)</td>
</tr>
</tbody>
</table>

Additional Occupational Exposure Limit Values for possible hazards during processing:
Compliance with the general dust limit value(s) (lung penetrating and/or inhalable fraction) must be ensured. The AGW for nickel is to be used only for nickel metal.
For thermal processes in the presence of atmospheric oxygen, oxidic nickel compounds must always be assumed and the ERB (TRGS 910) must be applied.

Additional information:
- The lists valid during the making were used as basis.

8.2 Exposure controls

Personal protective equipment:
General protective and hygienic measures:
Keep away from foodstuffs, beverages and feed.
Wash hands before breaks and at the end of work.

**Respiratory protection:**

In the case of dust formation (limit value exceeded), breathing apparatus must be worn. Time limits for wearing must be observed.

Breathing mask, apparatus with particle filter P2 or P3, for example:
- Full face mask (EN 136)
- Breathing mask (EN 149) FFP2 or FFP3
- 10 times the limit value (FFP2)
- 30 times the limit value (FFP3)
Recommendation: P3

**Protection of hands:**

Avoid repeated and prolonged contact with the skin, use protective gloves.

Preventive skin protection by use of skin-protecting agents is recommended.

**Material of gloves**

Experience has shown glove materials polychloroprene, nitrile caoutchouc, butyl caoutchouc, fluoride caoutchouc and polyvinylchloride to offer sufficient protection.

**Penetration time of glove material**

**Eye protection:**

In the event of larger quantities of dust:
Wear protective glasses / EN 166, poss. with side protection.

**Limitation and supervision of exposure into the environment**

The legal issue values and limitations are to be paid attention!

(Contd. on page 6)
SECTION 10: Stability and reactivity

- **10.1 Reactivity**: No further relevant information available.
- **10.2 Chemical stability**
  - **Thermal decomposition / conditions to be avoided**: No decomposition if used according to specifications.
- **10.3 Possibility of hazardous reactions**
  - Hydrogen is released in contact with acid which can cause explosive gas mixtures.
- **10.4 Conditions to avoid**: No further relevant information available.
- **10.5 Incompatible materials**: No further relevant information available.
- **10.6 Hazardous decomposition products**: No dangerous decomposition products known.

SECTION 11: Toxicological information

- **11.1 Information on toxicological effects**
  - **Acute toxicity**: Based on available data, the classification criteria are not met.
  - **LD/LC50 values**:
    - 7440-02-0 nickel
    - Oral [LD50] >9,000 mg/kg (rat)
  - **Primary irritant effect**:
    - **Skin corrosion/irritation**: Based on available data, the classification criteria are not met.
    - **Serious eye damage/irritation**: Irritation of the eyes in the case of massive direct contact will be mainly due to mechanical effects depending on the grain size.
    - **Respiratory or skin sensitisation**: May cause an allergic skin reaction.
  - **Additional Information**:
    - **Repeated dose toxicity**
    - **Germ cell mutagenicity**: Based on available data, the classification criteria are not met.
    - **Carcinogenicity**: Suspected of causing cancer.
    - **Reproductive toxicity**: Based on available data, the classification criteria are not met.
    - **STOT-single exposure**: Based on available data, the classification criteria are not met.
    - **STOT-repeated exposure**: Causes damage to organs through prolonged or repeated exposure.
    - **Aspiration hazard**: Based on available data, the classification criteria are not met.

SECTION 12: Ecological information

- **12.1 Toxicity**
  - **Aquatic toxicity**: No further relevant information available.
- **12.2 Persistence and degradability**: No further relevant information available.
- **12.3 Bioaccumulative potential**: No further relevant information available.
- **12.4 Mobility in soil**: No further relevant information available.
- **Additional ecological information**:
  - **General notes**: Alloys in solid form do not pose an ecological threat.
- **12.5 Results of PBT and vPvB assessment**
  - **PBT**: Not applicable.
  - **vPvB**: Not applicable.

• 12.6 Other adverse effects No further relevant information available.

SECTION 13: Disposal considerations

• 13.1 Waste treatment methods
• Recommendation Observe official regulations.
• Uncleaned packaging: Not applicable

SECTION 14: Transport information

• Transport/Additional information:
  • Land transport ADR/RID (cross-border):
    • Remarks: Non-hazardous goods from the standpoint of the specified regulations
  • Maritime transport IMDG:
    • Remarks: Non-hazardous goods from the standpoint of the specified regulations
  • Air Transport ICAO-TI and IATA-DGR:
    • Remarks: Non-hazardous goods from the standpoint of the specified regulations

SECTION 15: Regulatory information

• 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture
  • Directive 2012/18/EU
  • Named dangerous substances - ANNEX I None of the ingredients is listed.
  • REGULATION (EC) No 1907/2006 ANNEX XVII Conditions of restriction: 27
  • DIRECTIVE 2011/65/EU on the restriction of the use of certain hazardous substances in electrical and electronic equipment – Annex II
    None of the ingredients is listed.
  • National regulations:
  • Other regulations, limitations and prohibitive regulations
    • e.g.
      - 1272/2008/EG (CLP)
      - 1907/2006/EG (REACH)
      - German Hazardous Substances
      - TRGS 561 / TRGS 910
  • 15.2 Chemical safety assessment: Void (for articles)

SECTION 16: Other information

This information is based on our present knowledge. However, this shall not constitute a guarantee for any specific product features and shall not establish a legally valid contractual relationship.

• Reasons for alterations
  The material safety data sheet has been re-compiled in connection with the 28th adaptation of regulation 67/548/EEC.
  All previous safety data sheets become invalid.

• Relevant phrases
  Wording of the hazard warnings mentioned (Chapter 3) for pure substances:
  H251 Self-heating: may catch fire.
  H317 May cause an allergic skin reaction.
  H351 Suspected of causing cancer.
H372 Causes damage to organs through prolonged or repeated exposure.
