Specification

Item no.: T60404-N4647-X460

K-No.: 26657

50A Current Sensor
For the electronic measurement of currents: DC, AC, pulsed, mixed with a galvanic Isolation between the primary circuit (high power) and the secondary circuit (electronic circuit)

Date: 28.08.2017

Customer: Standard type

Description
• Closed loop (compensation)
  Current Sensor with magnetic probe
• Printed circuit board mounting
• Casing and materials UL-listed

Characteristics
• excellent accuracy
• very low offset current
• very low temperature dependency and offset current drift
• very low hysteresis of offset current
• short response time
• wide frequency bandwidth
• compact design
• reduced offset ripple

Applications
Mainly used for stationary operation in industrial applications:
• AC variable speed drives and servo motor drives
• static converters for DC motor drives
• Battery supplied applications
• Switched Mode Power Supplies (SMPS)
• Power supplies for welding applications
• Uninterruptable Power Supplies (UPS)

1) Constructed and manufactured and tested in accordance with IEC 61800-5-1:2007 (primary to secondary)
Reinforced insulation, Insulation material group 1, Pollution degree 2, Overvoltage category III

The current sensor passed the EMI susceptibility tests (vertical and horizontal, one direction) according to the standard 61000-4-3:2010 at 20V/m, 80%AM@1kHz over the frequency range of 80MHz to 1000MHz, level a) with <2% variation of the Vout during the stress.
50A Current Sensor
For the electronic measurement of currents:
DC, AC, pulsed, mixed with a galvanic Isolation
between the primary circuit (high power) and the
secondary circuit (electronic circuit)

Mechanical outline (mm):
General tolerances DIN ISO 2768-c

Connections:
Pin Nr. 1-6: Ø1.5mm
Pin Nr. 7-10: 0.6 x 0.7mm

Marking:
UL
4647-X460
F  DC

**Other instructions:**

- Current direction: A positive output voltage vs. $V_{\text{REF}}$ appears at point $V_{\text{OUT}}$, if primary current flows in direction of the arrow.
- Constructed, manufactured and tested in accordance with IEC 61800-5-1:2007.
- Temperature of the primary conductor should not exceed 105°C.
- Housing and bobbin material UL-listed: Flammability class 94V-0.
- Further standards: UL 508, file E317483, category NMTR2 / NMTR8
